

What is solar energy used for in the Netherlands?

In addition to photovoltaics, solar energy is used extensively for heating water, with 669.313 m² installed by the end of 2020. Generating a total of 326 GWh heat energy in 2020. Nearly 80% of solar power installed in the Netherlands in 2017 was for small systems of less than 10 kW, a large part being rooftop Solar PV.

What is the largest solar installation in the Netherlands?

2019 The largest solar installation in the Netherlands, the 103 MWp array in Groningen, becomes operational.
2020 The Netherlands passed the 10,000 MWp of installed PV capacity, becoming the 10th country to pass the 10 GW barrier.

Does the Netherlands have more solar power than Canada?

Although it has half the population, the Netherlands has four times more solar capacity than Canada, and that's not by accident. CBC's international climate correspondent Susan Ormiston explains how the Dutch became solar superstars and what Canadians could learn.

At Solarge, we believe in the power of the sun for a livable earth. Using our solar panels is a sustainable way to generate electricity, even on roofs with less load capacity. The solar panels are produced with low CO₂ emissions and are free of PFAS. In addition, they are fully recyclable, so that we can reuse all raw materials.
